

We are given the responsibility and independence to lead our own investigations

Our learning is enhanced through the outdoors, specialist visitors and access to high-quality resources

We build on our prior learning, enabling us to progress and develop our scientific knowledge further

## Parklands' Science Principles

*Created and agreed by staff and pupils*

We ask questions and work together to discover the answers

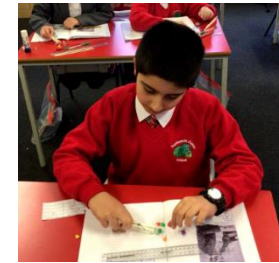

**Science is good when...**

We are able to link our learning to the real world and are provided with a sense of purpose

We accumulate scientific knowledge and develop our conceptual understanding through a range of scientific enquiries

We are involved in creating and carrying out investigations and can share and explain our ideas and conclusions

We apply our 'working scientifically' skills to solve problems, explore and investigate
